---

Breastplate: Upper left (non-matching): . Upper right (non-matching): . Lower left (non-matching): . Lower right (non-matching): . These are all non-matching breastplates with the same serial #. This leads to the question "Did there exist a different serial # on these breastplates?" The answer to that question is NO. These are all one and the same matching serial number. The corselet numbers on this helmet come to their full conclusion with a 7. The right side of the corselet numbers are 5, which is the total of the 7 plus 1. The corselets are made of brass and finished off with either a white or a blue enamel. The breastplates are made of bronze. As you can see, a very nice example of a Siebe Gorman diving helmet. There are many people out there looking for the perfect diving helmet, and this is it. Siebe Gorman & Co diving helmets were made from the late 1800s up to 1950s. This is a rare piece of diving history. This is a vintage diving helmet by Siebe Gorman & Co. A big thank you to Andrew Zolnerowich for sharing this piece of history with me. Andrew has been in the diving business for over 25 years. He also owns and operates DivingSeal.com, one of the largest underwater resellers on the internet. This diving helmet is for sale, if you are interested, please email me. The links to the pictures are provided in the video description. History of divers' History of diving History of diving in Siebe Gorman & Co diving helmets History of divers' History of diving in Siebe Gorman & Co diving helmets History of divers' History of diving in Siebe Gorman & Co diving helmets Siebe Gorman & Co Siebe Gorman & Co was a diving equipment manufacturer from 1860 until 1947. Siebe was based in Leuven, Belgium. The company was founded in 1860 by Gebhard Gorman (Gauenhard) and Julius Siebe. Between 1860 and 1900 Siebe Gorman & Co. manufactured hundreds of different types of divers' helmets, mainly diving helmets, but also diving and surface regulators, wet suits, chemical breathing apparatus, masks and much more.
