But i am confused how to store it. I need to store these 3 things Date:3/10/2015 User\_Name:Demo Score:1 If score is 0 then it should update that user\_name. Currently I have an Array in mysql. A: You can create a table with 3 columns user\_name, date\_time, score Then you store it. For retrieval, you can simply query SELECT user\_name, date\_time, score FROM tableName WHERE user\_name = 'demo' This would return only rows where user\_name is 'demo' and 'date\_time' is current time, and'score' is 0. Hope this helps.
