Fix your registries and it will run on every computer without any program related to it and it will be compatible to your driver. The desmo_radio_serial.dll file is a program for the Windows operating system that allows you to listen to several stations and channels online. Your name or email address will not be published. In Windows, you can go to C:\Program Files (x86)\xbox360\setup\ and rename it to games.ini. When you enter the Desktop.ini file, you should find the directory (C:\Users\YourAccount\AppData\Roaming\Microsoft\Windows\Desktop.ini) containing the directory (C:\Users\YourAccount\AppData\Roaming\Microsoft\Windows\Libraries\desmo_radio_serial.dll) containing the folder (C:\Users\YourAccount\AppData\Roaming\Microsoft\Windows\Libraries\Desmo_radio_Serial). You may see that the folder name is different from the file name. Click on the link to download the application. Right click on the file and extract it. Rename the file to desmo_radio_serial.dll. (Windows Vista) Click the start button and type explorer into the Search box and click on the search result. Go to File and then Add programs or Features, but only do this if you are not using the Microsoft operating system that is Windows XP. Click on Add or Remove Programs and then select OK or Yes if it asks if you want to install or remove the program. When the program completes installing, close the Add or Remove Programs window. Click on the Start button and go to Control Panel. Then select Add/Remove programs and make sure it is not set to only search on the internet. Right click on the folder and go to properties. Click on the General tab and click on the read-only check box. Then click on
