**CineSamples CineBrass KONTAKT.torrent 2022 [New]**

Cinesamples' original Core Library took over ten months to record in the studios, and consists of over 1,400 instruments recorded in 825 performances across the following brass genres: woodwinds, tubas, trumpets, trombones, tubular bells, tenor horns, cornets, euphoniums and French horns. The Cinesamples Core Library offers unprecedented sample resolution, providing instrument samples, articulations, micro-tunings and timbres with unprecedented accuracy, while maintaining the highest sound quality. In addition to the Core Library, you can purchase a set of individual instruments (available separately or as part of a full instrument bundle). The CineBrass was released in three formats: Version 1.0 : The original version of the CineBrass Library. Version 1.1 : The first version of the CineBrass which includes the 'CineBrass' instrument, tuned to c' = c, with micro-tunings for each key. Version 1.1.1 : The first Cinesamples release which adds a new instrument to the Core Library, the Euphonium with micro-tunings for each key. The CineBrass provides a unique palette of orchestral brass instruments and an easy to use interface for the creation of brass-based compositions, soundtracks, loops, solos and parts. The CineBrass Core Library is available in the following formats: Cinesamples Core Library (Kontakt Instrument Library): This library can be used with Kontakt 3 and higher. CineBrass Core Library (Kontakt Instrument Library): This library can be used with Kontakt 5 and higher. CineBrass Conductor Edition (Sample Player): This sample player is a modernized version of Cinesamples' original sample player that includes the ability to load Kontakt instruments and presets created with this software. In addition, Cinesamples offers a comprehensive online teaching platform that allows you to access the library's samples and create your own custom orchestral-style scores. With Cinesamples, the interface is as simple as tapping a key on your keyboard, or importing an existing project that you have created using the Steinberg Cubase, Digital Performer, FL Studio, Logic Pro, Pro Tools or ProTools LE. The Cinesamples online teaching platform is not a standalone application
