
successfully treated with intrapartum antibiotic prophylaxis. In contrast, penicillin-resistant, early-onset disease typically requires surgical treatment. Maternal immunization with a single dose of intrapartum benzathine penicillin protects 80% to 90% of infants for at least 2 years. However, GBS is a dynamic, rapidly evolving organism. Therefore, the prevention of early-onset disease remains challenging. New maternal and infant GBS vaccines are in development. Q: I am trying to include a file in my PHP for Django 1.7.8 I am trying to make a simple application. I am relatively new to Python but I have made many PHP websites before. I have tried to follow what I have 55cdc1ed1c
