CE-Secure is an easy to use data encryption software program that offers the maximum protection provided by AES 256-bit encryption algorithms. With CE-Secure you can create encrypted zones in the unused portion of your hard drive or other data storage devices. These encrypted zones can then be used to securely store your sensitive or private documents, photos, music or videos. CE-Secure Features: - Password Encrypted Areas: With CE-Secure you can create password-protected encrypted areas in the unused portion of your hard drive or other data storage devices. These encrypted zones can then be used to securely store your sensitive or private documents, photos, music or videos. With CE-Secure you can password protect areas using 12 character alpha-numeric passwords. - Homepage: When CE-Secure starts it creates a plain-text password that you can use to access the home page. This page contains a link to the AES encryption options you can use for data encryption. - AES 256 Bit Encryption: CE-Secure uses AES 256-bit encryption algorithms to protect your data. AES 256-bit encryption is the gold standard and considered one of the best available encryption algorithms. - Encryption of a

minimum size of 32KB: CE-Secure can encrypt large amounts of data and with a minimum size of 32KB it can be used to protect folders, directories, sub-folders and files. - Safe Area: CE-Secure has the ability to create a safe area where you can browse encrypted files without the risk of accessing the underlying data. - Supports AES 128, 192, and 256-bit encryption algorithms: CE-Secure supports all major encryption algorithms. By default CE-Secure uses the 256-bit AES encryption algorithm. You can also select the 128-bit, 192-bit and 256-bit encryption algorithms if you need to. - Supports file or folder based encryption: CE-Secure can encrypt folders and can encrypt any files or folders you wish. - Supports drag & drop file encryption: CE-Secure can encrypt the drag and drop files to an encrypted area. This feature allows you to encrypt files which cannot be normally dragged and dropped into an encrypted area. - Supports drag and drop encrypted area encryption: CE-Secure can encrypt a small portion of an area or an entire area. Drag and drop encrypted area encryption allows you to easily drag files from the temporary encrypted area to an encrypted area. - Compress files or folders before encryption: CE-
