Prayertime Version History New for Version 1.05 (10 July 2010):The digital clock and the tab moved to the right side of the main window. New for Version 1.0 (24 July 2009): Initial release of Prayertime, check it out! For full information and screen shots about the gadget, Click Here. Please leave a comment if you have any suggestion, problem, or need any help. 3 Comments This is very good, and I didn't know about this site at all. I have an issue with downloading the sidebar, however, and when I do and I go back to the main window, it doesn't refresh the time, i.e. I do the update but it doesn't show the new time. I appreciate any help you can offer. Totally agree with you. I have one issue with that too, the time that is updated in the main window doesn't change after I updated the sidebar. I have checked the update panel, but it seems that it doesn't re-read the data source on the server. This is quite strange. Dear, please don't worry too much about it, it is normal for it to happen. I have an issue on my side with the same problem, but no one else seems to be having it. So, I am unable to give you a more suitable solution than just to wait. I have used Prayertime for several months without any problems at all. But this one is really making me crazy. I have the same problem and I would really love to know how to fix it. I have tried every possible solution I could come up with, but it is still not working. I would like to know how to get this working, or if it's a hopeless task to get this fixed.

System Requirements:

AMD® (or equivalent) CPUs: Intel® (or equivalent) CPUs: OS: See system requirements for OS and related utilities. Software: None of the software applications listed in this document will function without an AMDGPU-PRO driver. However, the AMDGPU-PRO driver is not required to run any games listed in this document. The primary purpose of AMDGPU-PRO is to provide video, overlay and display metadata through the AMDGPU-PRO open source libraries. Please see the main page of the AMD
