Whether you're a beginner or an experienced photoshopper, it's important to know about the tools available to you and how to use them. In this Photoshop Basics tutorial, we'll show you how to use the most basic features to organize images and edit text. We'll also teach you to correct flaws in your photos and apply frames to images. Let's get started. Understanding the Photoshop Layers The Layers panel is the main panel in Photoshop. It allows you to view and manipulate multiple objects, which can be changed at any time. Photoshop has many different layers, but the most common is the Background layer. It's used to remove objects from your photo; it's the layer that represents the photo itself. The more layers you have, the more objects you can add to the photo. You can create up to 20 layers in Photoshop CS6. It's a great tool for manipulating multiple layers at once, but you can easily go over this amount. When it comes to using layers, you can choose from these three main commands: Hide Lock Merge Hide Layers are easily hidden and shown. This is the fastest way to hide a layer. Click the small eye icon next to a layer and choose Hide from the Layers panel menu. To show it again, click on the eye icon again. To show a hidden layer, click the eye icon that appears next to a layer in the Layers panel. To hide it again, click the eye icon. Lock Layer Locking is more complicated. It allows you to hide and change layers at any time. When a layer is locked, it can't be hidden or changed. Locking can be useful if you're creating a graphic design for a client and want to hide layers that you're not sure if they need to be seen until after you've completed the design. To lock a layer, click the eye icon next to the layer, and select Lock from the menu. Unlock the layer by clicking the eye icon again. Merge Merge layers allows you to copy an existing layer onto a new one. You can use the Master tool to merge layers by dragging it over the existing layer. Merge two layers by clicking the eye icon next to them. Select Merge from the menu. Adding Text In

Bacterial plaque removal from root surfaces after periodontal therapy. Bacterial plaque on the apical surface of root canals is a cause of periodontal disease. Removal of this plaque is an important factor in preventing the disease. The purpose of the present study was to investigate the effect of scaling and root planing on bacterial plaque on the apical root surface in a biofilm model in vitro. Root canals of extracted teeth were contaminated with 10(8) colony-forming units of *Actinomyces naeslundii* T14V and *Actinomyces viscosus* T14V. The teeth were subjected to scaling and root planing and cultured for an additional 7 days. Cultures were performed with a viscous medium, agar. Colonies of T14V which were present on root surfaces before therapy (contaminated) and after therapy (contaminated/sterilized) were estimated with appropriate dilutions. The results showed that after therapy no T14V could be found in the root canals or in the surrounding root tissues. [Explaining the patient. A psychoanalytic understanding of the treatment process]. According to Freud, analysis is an autonomous activity in which all aspects of the patient's personality are examined and re-established. In a complementary aspect, the analyst takes part in both analysing and re-establishing the patient's personality. The nature of the process of analysis differs from one patient to the next. In this paper, the author examines the psychoanalytic concept of transference and countertransference. She points out that the analyst forms his own unique version of the patient's personality which determines both the way he perceives the patient and his own feelings towards the patient, and which affects the therapy process. The author stresses the importance of the transference and countertransference in relation to the way the patient is analyzed. She argues that the latter involves certain demands placed on the patient in terms of his ego and super-ego. An example is provided where the analyst will present the patient with a certain image of himself which acts as a compulsion in terms of the work on his ego. It is concluded that if the analyst is able to understand and acknowledge the patient's transference, he can respond both to it and facilitate the process of analysis. "If he's ruling fairly, and that's how I look at it, there's no reason to prevent him from doing what he's doing" Obama administration official President Barack Obama's high-level campaign arm has been secretly financing the efforts of millions of Democrats across the country to thwart a Republican-led attempt to block Obama's choice for director of the Central Intelligence Agency, several senior administration officials said. Four officials in the Obama re-election campaign told The Washington Post that the White House has been secretly providing \$10-million-a-month to far-flung Democratic groups, including super PACs, that are spending hundreds of millions of dollars against GOP Senate candidates deemed "extreme." In all, the Obama campaign has donated about \$100-million to various Democratic groups since the 2012 election, the Post reported. The \$10-million-a-month ad buys from the White

House are being used to air television spots calling out Republicans who are seeking to block CIA nominee John Brennan over his role in the use of enhanced interrogation techniques on terrorists. The spots are running in states like Alaska, Nebraska and North Dakota. Another campaign official, who is also one of Obama's closest White House advisers, said the White House is unsure how much of its money will be spent on the operation as most of it comes from the president's re-election fund, not the campaign's general treasury. Asked whether the administration is still concerned about "inaction creep" where Democrats might use the 2010 Intelligence Committee report on the use of torture as a political weapon against Republicans, the senior administration official said that "if he's ruling fairly, and that's how I look at it, there's no reason to prevent him from doing what he's doing." The official said that the White House never discussed its tactics with the Democratic groups, saying it is "beyond the point" where anyone in the White House can find out who the groups are. "It's one of those things where we don't know what's going on except for us," the official said. "This is not how the White House would operate." Facing an uphill battle against the Republican Senate campaign committee, Democrats are looking to turn the tables on the GOP and take control of Congress in 2014. According to the senior administration official, the White House's strategy is simple: "Make the Senate race ugly enough that it actually costs some of these candidates money," the official said.
